

ZAKARIA AYAD

I AM LOOKING FOR A PFE INTERNSHIP

I am a 21-year-old fifth-year computer science engineering student (Information and Decision Support System) at the National School of Applied Sciences of Tetouan and am looking for a PFE internship starting from February 2026. Passionate about new technologies, I have worked on several academic IT projects and collaborated with Moroccan and other countries students, which has allowed me to strengthen my skills. Motivated, I want to apply my knowledge to make a significant contribution to the company's projects in **FullStack & AI & DevOps**

Tetouan, Morocco

SKILLS

version control, testing tools Git, GitHub, Gitlab, Postman, Swagger, sonarqube, node-red

DevOps Docker, podman, GitHub Actions, K8s(basics)

Project management

Jira, Trello, slack, Agile, Scrum, Waterfall.

OS Shell Script, Ubuntu, vmware, vbox, proxmox

Cloud AWS

Programming language and framework

Spring Boot/AI/Security/Cloud, Jee, Angular, Laravel, Flask, Streamlit, Tailwind, bootstrap, java fx, Java, JavaScript, TypeScript, Python, C, PHP

Markup language Html, Css, jsp, Xml, Json, Yaml, Markdown.

Modeling Merise, UML, Design patterns, Solid

Data kafka, ETL, Oracle, Mongo DB, H2, Postgres, sql lite, mysql, mockaroo

Others Microservices, Ajax, odoo, Keycloak, Figma, Cryptography, Urbanization, Web sockets, n8n, Agentic ai, Rag

Team spirit, Problem-solving, Adaptability, Communication

EDUCATION

ENSA Tetouan 2021 - 2026

Bac +5 in Computer Science Engineering.

kadi Ayad 2018-2021

Bachelor in Sciences, Secondary Education.

LANGUAGES

- English: C1
- French: B2
- Spanish: A1
- Arabic: C2

EXTRACURRICULAR ACTIVITIES

- Read documentations and take international courses.
- Active member, Project Manager, InfoTech Club, ENSA Tetouan.
- Member of Dev_FullStack Community.
- Participant in the workshop "From Learning to Earning", InfoMath Club.

PROFESSIONAL EXPERIENCE

PFA at NAJAH_HOST 2025

2 months Hybrid

built AI help desk chatbot providing automated support for general and account-specific inquiries, using AI APIs, external/internal data, and knowledge base. Admin dashboard manages knowledge base, conversations, and API endpoints for efficient client support.

Tools: Spring boot, Angular, git

internship, Veolia

2 months On-site

Conducted data management through standardized modeling, analysis, and visualization; migrated CSV data to a database and designed a user interface, enhancing data processing and accessibility efficiency.

Tools: Python, Js, Sql, Git, Excel, streamlit

Internship, TechnoHack

1 month remote

Built interactive web tools with enhanced UI to improve user experience.

Tools : Python, Html, Css, Js, Git, Power Shell

PROJECTS

Autonomous AI Agent Deployment Framework

Developed a comprehensive, end-to-end pipeline to architect and deploy autonomous AI agents to executing complex task sequences through sophisticated reasoning and tool interaction.

Tools: OpenAI API, LangChain, LangGraph, Langsmith, python

Annual Income Prediction Model - Machine Learning

predict Moroccan individual annual income using a custom 40,000-record synthetic dataset, training & comparing multiple models, deploying

Outils : Streamlit, FastAPI, Colab, Python (visualisation, manipulation...).

Production-Ready Patient Management System

designed microservices architecture to handle functionalities (patient data management, billing, analytics, and authentication) in a scalable way.

Tools: Spring Boot, Docker, PostgreSQL, Apache Kafka, Spring Cloud Gateway, gRPC, REST APIs, JWT, AWS, JUnit

Real-Time Messaging Platform

secure platform to replicate the core functionalities of the WhatsApp, including instant chat, media sharing, and message status tracking...

Tools: Spring boot, Angular, git, keycloak, web sockets

student document management system

Collaboration in the creation of a web application for managing requests for academic documents.

Tools: Spring boot, Angular, Uml, Merise, git, postman, mysql

CERTIFICATES

Getting Started with Storage and Compute

Amazon Web Service
